DATE:	Tuesday, June 15, 2021
LOCATION:	Virtual-Zoom
LOG IN TIME:	9:10 am
PROGRAM TIME:	9:15 -10:45 am
COST:	Free to our members!

The Evolution of Discovery Management Technology – Analog to Digital & Beyond

Program presented by: Christopher Hansen

Discovery document management entered the computer age about 50 years ago, with some historians tracking it back to a single litigation fought between two giants of the “big machine” computing era. From those now obscure origins, it first passed through the heyday of the “coding project,” designed to harness computer power to vast paper document repositories, using mainframe retrieval systems whose names are all but lost to time. The 90s were a fitful period as the industry struggled to adapt to the digitizing of those paper collections – complicated throughout by internecine “format battles.” The new millennium brought yet another sea change, as it gave way to the electronic discovery landscape that has dominated the technology, the challenges, and the opportunities (Artificial Intelligence, take a bow) for nearly the last two decades. And all through that, one curious element has survived: the humble Bates Number.

Learning Objectives:

- Understanding how evolution has landed us where we are; what has changed and what remains the same in order to bridge the procedural gap between senior and more tech-savvy litigators.
- Predicting what’s next to create a strategy for E-discovery in your firm
- Adjusting for the impacts on litigation (and law firm) management

Christopher Hansen is the Director of Electronic Discovery & Litigation Support at Marshall Dennehey Warner Coleman & Goggin. Through a range of roles that have crossed consulting firms, litigation support providers, and four law firms ranging from 500 to 1,800 attorneys in size, he brings 35 years of discovery technology experience to the subject of this session.

This course is eligible for 1.5 credit hours in the following areas:

- CLM app: Information Technology
- CLM Functional Area: Operations Management
- Recertification area: Operations Management

Our sponsor for this event is:

 David Bartolini
